About half of residential water is used for outdoor irrigation.

By opting for drought tolerant, native, and climate appropriate plants, you can help save water while creating a beautiful and healthy landscape.

Water Efficient Landscape Rebate Program

Convert your lawn to a drought tolerant landscape and earn up to \$1500 towards qualifying projects!

SOLANO COUNTY
WATER AGENCY

What is the Water Efficient Landscape Rebate Program

Solano County Water Agency is offering a rebate of up to \$1500 (\$1.50 per square foot) to eligible customers who convert their lawn/sod to a drought friendly landscape!

Eligibility

Property must be within Solano County

Lawn must be at minimum 300 square feet.

Project must have grass (dead or alive) at time of inspections

Projects already completed cannot receive a rebate retroactively

Projects incorporating artificial turf, concrete, or rubber mulch will be disqualified.

Steps to Apply

DO NOT REMOVE YOUR LAWN UNTIL AFTER YOU HAVE BEEN APPROVED FOR YOUR PROJECT

Apply online at www.scwa2.com

Complete a digital pre-inspection or contact our team to arrange an in-person visit by calling 707-455-1113

Once your project has been inspected and approved you have 120 days to complete your project

Plan your project using low water-use plants, efficient irrigation, and permeable materials. **ARTIFICIAL TURF (FAKE GRASS) AND CONCRETE ARE NOT ELIGIBLE MATERIALS**

When your project is done, complete a digital post-inspection or contact our team!

After post-inspection, you will receive a check in the mail within four to six weeks

Benefits of a Low-water Use Landscape

Encourage native biodiversity!

Save money on your utility bills!

Reduce your water use!
